

as my husband and i are over-the-road truck drivers, we rely on the traffic and weather information we receive on our satellite radio. Driving down the road we cannot keep trying to get local weather on our regular radio while paying attention to the traffic, especially if the weather is bad. we respectfully urge you to reject the NAB's petition 04-160. we should be allowed to have the kind of programming that we want to pay for. thank you, and please do the right thing by keeping our satellite radio the way it is.
